

Internationally recognized as a leader in Scleral lens technology, AccuLens® offers the most custom scleral lens on the market. With a proprietary multi-curve/aspheric posterior, the Maxim® scleral lens is designed to align and fit the *distorted cornea* like no other. The Maxim Scleral lens is a single vision design while the Maxim Plus is presbyopia design.

Maxim scleral lenses were developed to cover a diverse range of corneal distortion including advanced Keratoconus and Pellucid to Post Surgical and Corneal Trauma. All Maxim scleral lenses are 100% custom and come with a 90 day warranty.

DIAMETER	POWER	MATERIAL	TORIC	ADD
15.7mm—20.5mm	±20.00	Boston® XO2\140 dk	Up to -6.00	+1.00—+3.50

A Maxim scleral lens trial set includes 20 diagnostic lenses in four different diameter ranges to cover multiple types of corneal disorders. Each set will have a detailed fitting guide and the care and handling video.

“Any person who has keratoconus knows that often times you must sacrifice visual acuity for comfort. Since being fit with these contacts, I no longer have "red" eyes, headaches or struggle to see at the end of the day.”

Margaret J.
